

Cat No: **ESC962** – Esophagus cancer tissue array

Lot#	Cores	Size	Cut	Format	QA/QC
ESC96201	96	1.5mm	4um	8X12	H&E, IHC anti-Cytokeratin

Recommended applications: For Research use only. RNA or protein esophagus cancer/non-tumor tissue profiling using IHC or ISH; Antibody characterization.

Description: Esophagus cancer tissue array, non-overlapping with ESC961, including 48 cases of normal, inflammatory, and cancerous (different grades & stages) tissues of the esophagus in duplicates. All the tissues were from surgical resection. They were fixed in 10% neutral buffered formalin for 24 hours and processed using identical SOPs. Sections were picked onto Superfrost Plus or APES coated Superfrost slides. They all have a guaranteed six months' shelf-life at 4C from the date of shipment. Each slide has >95% tissue core retention.
