

Cat No: AMS543 – Normal Mouse (CH3/He strain) tissue array

Lot#	Cores	Size	Cut	Format	QA/QC	
AMS54301	54	1.5mm	4um	6X9	H&E	

Recommended applications: Whole body RNA or protein mouse tissue profiling using IHC or ISH; Antibody characterization.

Description: Mouse tissues of CH3/He strain cover 22 organs/anatomic sites, most of which have triplicates from 3 individual mice.

All the tissues were from surgical resection. They were fixed in 10% neutral buffered formalin for 24 hours and processed using identical SOPs. Sections were picked onto Superfrost Plus or APES coated Superfrost slides. They can be stored for use at 4C for up to six months from the date of shipment. **There may be 5 to 10% of tissue core loss.**

Array Position	Sex	Age	Anatomic Site	Pathology	Grade	Stage

Notes: Bake at 60C for ~60 minutes before use. If antigen retrieving is needed, it is important to avoid **direct-boiling and high pH or high strength** antigen retrieving buffer. For availability of complimentary IHC data, please contact us at info@pantomics.com.
