

Cat No: CXC962 - Cervical cancer tissue array

Lot#	Cores	Size	Cut	Format	QA/QC	 	
CXC96201	96	1.5mm	4um	8X12	H&E, IHC anti-Cytokeratin		

Recommended applications: For Research use only. RNA or protein cervix cancer/non-tumor tissue profiling using IHC or ISH; Antibody characterization.

Description: Cervical cancer tissue array, non-overlapping with CXC961, 96 cores including 36 cases (purple/blue) of cervix cancers and 12 cases of normal and inflammatory tissues of the cervix (pink) in duplicates.

All the tissues were from surgical resection. They were fixed in 10% neutral buffered formalin for 24 hours and processed using identical SOPs. Sections were picked onto Superfrost Plus or APES coated Superfrost slides. They can be stored for use at 4C for up to six months from the date of shipment. **There may be 5 to 10% of tissue core loss.**

Notes: Bake at 60C for ~60 minutes before use. If antigen retrieving is needed, it is important to avoid **direct-boiling and high pH or high strength** antigen retrieving buffer. For availability of complimentary IHC data, please contact us at info@pantomics.com.

* - Small tissue samples. Cores may be missing.

Certified by: Fancai Li, M.D.

TNM Classification: Cervical carcinoma

T- Primary tumor

TX - Primary tumor cannot be assessed

TO - No evidence of primary tumor

Tis - Carcinoma in situ

T1 - Cervical carcinoma confined to uterus (extension to corpus should be disregarded)

T1a Invasive carcinoma diagnosed only by microscopy. Stromal invasion with a maximum depth of 5.0mm measured from the base of the epithelium and a horizontal spread of 7.0mm or less. Vascular space involvement, venous or lymphatic, does not affect classification.

T1a1 Measured stromal invasion 3.0mm or less in depth and 7.0mm or less in horizontal Spread.

T1a2 Measured stromal invasion more than 3.0mm and not more than 5.0mm with a horizontal spread 7.0mm or less.

T1b Clinically visible lesion confined to the cervix or microscopic lesion greater than T1a/IA2.

T1 b1 Clinically visible lesion 4.0cm or less in greatest dimension.

T1b2 Clinically visible lesion more than 4.0cm in greatest dimension.

T2 - Cervical carcinoma invades beyond uterus but not to pelvic wall or to lower third of vagina

T2a Tumor without parametrial invasion

T2b Tumor with parametrial invasion

T3 - Tumor extends to pelvic wall and/or involves lower third of vagina, and/or causes hydronephrosis or non-functioning kidney

T3a Tumor involves lower third of vagina, no extension to pelvic wall

T3b Tumor extends to pelvic wall and/or causes hydronephrosis or non-functioning kidney

T4 - Tumor invades mucosa of bladder or rectum, and/or extends beyond true pelvis (bullous edema is not sufficient to classify a tumor as T4)

N - Regional lymph nodes

NX - Regional lymph nodes cannot be assessed

NO - No regional lymph node metastasis

N1 - Regional lymph node metastasis

Phone: 415-863-2380
Support: info@pantomics.com

M - Distant metastasis

MX - Distant metastasis cannot be assessed

MO - No distant metastasis

M1 - Distant metastasis
