

## Cat No: **ESC962** – Esophagus cancer tissue array

Lot#	Cores	Size	Cut	Format	QA/QC	
ESC96201	96	1.5mm	4um	8X12	H&E, IHC anti-Cytokeratin	 

**Recommended applications:** For Research use only. RNA or protein esophagus cancer/non-tumor tissue profiling using IHC or ISH; Antibody characterization.

**Description:** Esophagus cancer tissue array, non-overlapping with ESC961, including 48 cases of normal, inflammatory, and cancerous (different grades & stages) tissues of the esophagus in duplicates.

All the tissues were from surgical resection. They were fixed in 10% neutral buffered formalin for 24 hours and processed using identical SOPs. Sections were picked onto Superfrost Plus or APES coated Superfrost slides. They can be stored for use at 4C for up to six months from the date of shipment. **There may be 5 to 10% of tissue core loss.**

Array Position	Sex	Age	Anatomic Site	Pathology	Grade	Stage

**Notes:** Bake at 60C for ~60 minutes before use. If antigen retrieving is needed, it is important to avoid **direct-boiling and high pH or high strength** antigen retrieving buffer. For availability of complimentary IHC data, please contact us at [info@pantomics.com](mailto:info@pantomics.com).

## **TNM Classification: Esophagus carcinoma**

### **T- Primary tumor**

- TX - Primary tumor cannot be assessed
- TO - No evidence of primary tumor
- Tis - Carcinoma in situ
- T1 - Tumor invades lamina propria or submucosa
- T2 - Tumor invades muscularis propria
- T3 - Tumor invades adventitia
- T4 - Tumor invades adjacent structures

### **N - Regional lymph nodes**

- NX - Regional lymph nodes cannot be assessed
- NO - No regional lymph node metastasis
- N1 - Regional lymph node metastasis

### **M - Distant metastasis**

- MX - Distant metastasis cannot be assessed
- MO - No distant metastasis
- M1 - Distant metastasis

TNM classification of malignant tumours, Fifth Edition (1997)
