Advancing Biomedical Science Through Tissue Arraya

Cat No: LYM1022 Diffuse large B cell lymphoma tissue array

Lot#	Cores	Size	Cut	Format	QA/QC	△ J	1 2 3 4 5 6 7 8 9 10 11 12 13	
LYM102201	102	1.5mm	4um	8X13	H&E, IHC anti- T and B cell markers	S, II	A B B B B B B B B B B B B B B B B B B B	+

Recommended applications: For Research use only. RNA or protein profiling of diffuse large B cell lymphoma/Non-Hodgkin B cell lymphoma tissue using IHC or ISH; Antibody characterization.

Description: Lymphoma tissue array, non-overlapping with LYM1021 or LYM1023, containing 102 cases of reactive lymphoid tissues (10 cases) and diffuse large B cell lymphoma/Non-Hodgkin B cell lymphoma (92 cases) tissues. IHC results for CD3, CD20, CD15, CD20, bcl2 may be available as complementary, but not confirmative data upon request.

All the tissues were from surgical resection. They were fixed in 10% neutral buffered formalin for 24 hours and processed using identical SOPs. Sections were picked onto Superfrost Plus or APES coated Superfrost slides. They can be stored for use at 4C for up to six months from the date of shipment. There may be 5 to 10% of tissue core loss.

Advancing Biomedical Science Through Tissue Array

Certified by: Fancai Li, M.D.

Clinical Staging: Malignant lymphoma

- Stage I Involvement of a single lymph node region (I), or localized involvement of a single extrahepatic organ or site (I_E)
- Stage II Involvement of two or more lymph node regions on the same site of the diaphragm (II), or localized involvement of a single extralymphatic organ or site and its regional lymph node(s) with or without involvement of other lymph node regions on the same side of the diaphragm (II_E). The number of lymph node regions involved may be indicated by a subscript (e.g. II_3)
- Stage III Involvement of lymph node regions on both sides of the diaphragm (III), which may also be accompanied by localized involvement of an associated extralymphatic organ or sites (III_E), or by involvement of spleen (III_s) or both (IIIe+s)
- Stage IV Disseminated (multifocal) involvement of one or more extralymphatic organs, with or without associated lymph node involvement; or isolated extralymphatic organ involvement with distant (non-regional) nodal involvement

A and B Classification

Each stage should be divided into A and B according to the absence or presence of defined general symptoms. These are:

- 1. Unexplained weight loss of more than 10% of the usual body weight for the 6 months prior to first attendance.
- 2. Unexplained fever with temperature above 38 degree
- 3. Night sweat

Pathological Staging

Splenectomy, liver biopsy, lymph node biopsy and marrow biopsy are mandatory for the establishment of pathological staging

TNM classification of malignant tumours, Fifth Edition (1997)
